

Stock List

Process downtime due to unexpected component failures can be costly and result in lost production time and revenue. Electro-Matic Integrated understands the need for durable and dependable cables that will perform in the most demanding manufacturing environments. Our industrial cable product portfolio consists of cables that have proven performance track records for applications such as machine tools, robotic automation, conveyors, servo motion control, automotive tooling/ automation, resistance welding, food and beverage production and more. Review our industrial cable stock list below or contact us for more information.

Tray Cable

- Easier to pull than standard tray cables; lower labor costs
- Black numbered conductors for easy identification
- Improved shielding effectiveness
- LAPP part number 220603
